

EFFLORESCENCE REMOVER

PRODUCT DESCRIPTION

- A powerful stripper that removes white efflorescence and concrete deposits from brick wall, concrete and stone.
- Formulated in response to the increasing demands of users in terms of safety, compliance.
- Significantly less hazardous than citric, hydrochloric and phosphoric acids.
- Removes cement, concrete and mineral deposits on fragile substrates such as metal (steel, aluminium), glass, rubber and glossy paints, without altering their appearance. It is ideal for mineral substrates and does not affect the surface porosity.
- Not classified as either corrosive or an irritant, unlike other products.
- Efflorescence Remover is 90% biodegradable and inert to the substrate (does not damage glass, metal or plastic, and is non-corrosive).

APPLICATION

Always carry out a test area first to ensure the finished result is acceptable.

- Shake the container well before use. Apply neat to dampened substrate, (do not dilute) using a brush or low pressure hand spray unit. Allow the product to act for 5 to 30 minutes (time required varies depending on the amount of efflorescence being removed). Do not let the surface dry out during application. If surface dries dampen area and re-apply.
- For old or heavy deposits you may need to repeat application.
- Brush off using a thick bristle broom, while rinsing with water. Avoid allowing the product to dry prior to rinsing.
- Clean all tools with water after use.

COVERAGE:

1 Litre will cover approx. 4 - 5m² (depending on porosity and texture of the surface)

RECOMMENDATIONS

- Wear protective gloves and glasses, and appropriate clothing whilst using the product. Do not dilute or mix with any other product, notably bleach (risks of evolution of toxic chloride gas).
- Do not allow the applied product to dry. Do not apply during rain or frost and when surface and air temperature is < 5°C and > 30°C.
- Once efflorescence has been removed we recommend the area is treated with either Paving & Patio Sealer or Stone & Render Sealer to maintain a pristine surface appearance..

Important: The content of this documentation is based on our experience of the product. PROTECTiT SP guarantees the quality of its products, but expressly declines any liability in the event of failure by the user to comply with the recommendations and conditions of use of said products, notably but not exclusively in the event of incorrect application, application by unqualified personnel, use of products not compatible with PROTECTiT SP products or bad weather conditions.

KEY FEATURES

- Powerful stripper
- Removes white Efflorescence & concrete deposits from brick, concrete & Natural stone
- Non-corrosive, safe, biodegradable
- Suitable for steel, aluminum, glass, rubber & glossy paints

TECHNICAL DATA

- **Physical State at 20 °C:** Liquid
- **Appearance:** Pale yellow
- **Odour:** Perceptible
- **pH:** 3.5 ± 0.5
- **Density:** 1.06
- **Solubility in Water:** Fully soluble
- **Flash Point [°C]:** > 250°C

Shelf Life & Storage: 24 months from the date of manufacture in the original unopened container. Store locked up in dry place between 5°C and 30°C in the original container.
